It is not the intention to provide, and you may not rely on this presentation as providing, a complete or comprehensive analysis of the Company's financial or trading position or prospects. The information contained in this presentation should be considered in the context of the circumstances prevailing at the time and has not been, and will not be, updated to reflect material developments which may occur after the date of the presentation. None of the Company nor any of its respective affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss or damage howsoever arising from any use of this presentation or its contents or otherwise arising in connection with this presentation.

This presentation includes forward-looking statements. Forward-looking statements include, but are not limited to, the company's growth potential, costs projections, expected infrastructure development, capital cost expenditures, market outlook and other statements that are not historical facts. When used in this presentation, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although MMG believes that the expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements.

This presentation may contain certain information derived from official government publications, industry sources and third parties. While we believe inclusion of such information is reasonable, such information has not been independently verified by us or our advisers, and no representation is given as to its accuracy or completeness.

This presentation should be read in conjunction with MMG Limited's interim results announcement for the six months ended 30 June 2017 issued to the Hong Kong Stock Exchange on 22 August 2017.

Safety performance

- Safety – our first value
- Record low half yearly TRIF for MMG of 1.14 per million hours worked in the first six months of 2017
- MMG’s TRIF benchmarks in the lowest quartile of all International Council on Mining and Metals (ICMM) members globally. 2016 member average TRIF was 4.19
- Committed to ICMM’s 10 principles of Sustainable Development
- We mine for progress. Contributing to the development of our host countries and communities

WE THINK
SAFETY FIRST

WE RESPECT
EACH OTHER

WE WORK
TOGETHER

WE DO WHAT
WE SAY

WE WANT TO
BE BETTER

1. Total recordable injury frequency per million hours worked
 2. Las Bambas safety data incorporated into MMG from January 2015

1. Las Bambas delivered

- ✓ Ahead of schedule/budget and established as one of the largest and lowest cost Cu mines in the world

2. Strong cash generation & debt reduction

- ✓ 12 month¹ Net Operating Cash Flow of US\$1.8b and Net Debt reduction of US\$1.4b. Spot copper would add ~US\$1b to Cash Flow²

3. Portfolio optimisation & efficiency

- ✓ Disposal of Golden Grove, Century and Avebury assets. Delivering a simpler, more focused business. Efficiency improvement programs across all operations and corporate

4. Dugald River ahead of schedule

- ✓ Dugald River project ahead of schedule and lowered capex budget. First production now expected in 2017

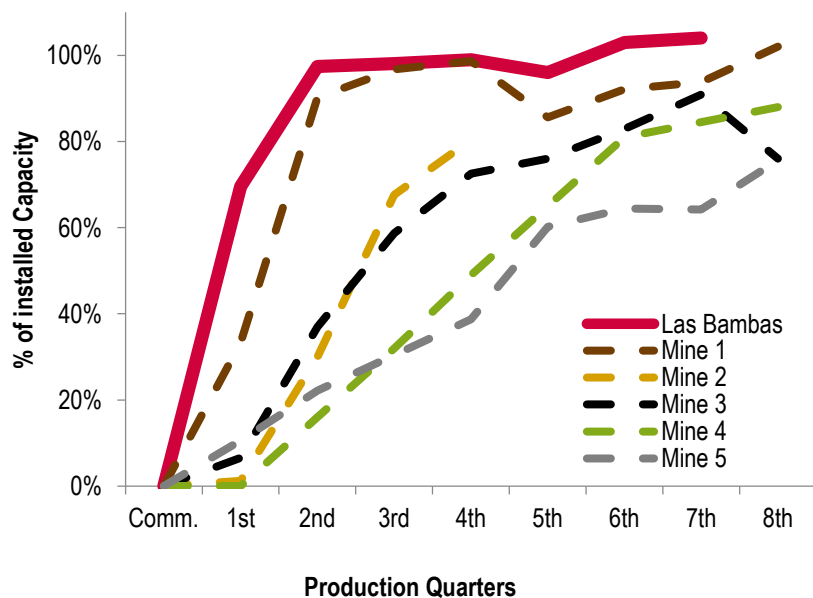

1. 12 months to 30 June 2017 (including 2H16 and 1H17 financial results)
2. Spot prices for Cu, Zn, Pb, Au, Ag, AUDUSD and USDPEN at 25/10/17

1. Las Bambas – world class delivery

- Over 12 months of stable operation, 430kt copper production to 30 June 2017, C1 US\$1.02 (FY17 guidance 440-460kt production and C1 of US\$0.95-1.05/lb)
- One of the lowest cost copper operations of this scale in the world
- Las Bambas efficiency review of external spend and productivity improvements. Full benefit expected in 2018.
- Initial 20+ year mine life producing copper, gold, silver and molybdenum (Molybdenum commercial production in 1H17).
- Exploration upside, only ~10% of tenement explored

Ramp up profile

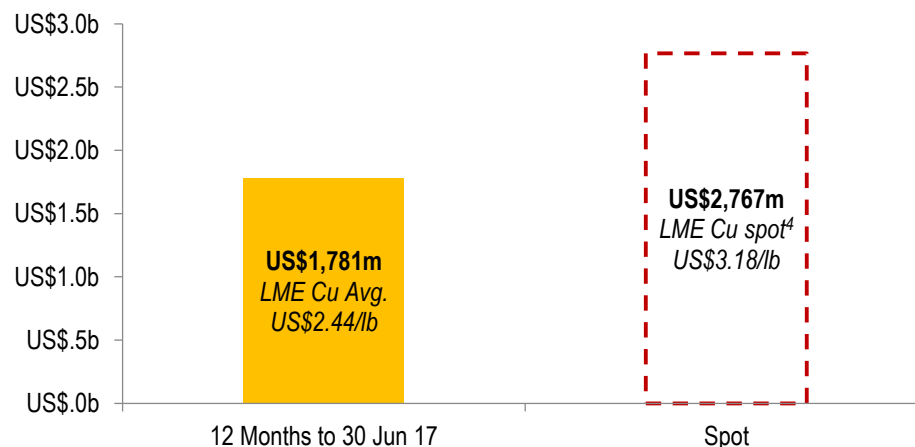

C1 cost (incl by-product credits)

2. Driving value – focus on cash generation

- US\$1.8b Net Operating Cash generated in 12 months to 30 June 2017.
- Spot commodity prices and FX adds ~US\$1b to EBIT and cash flow.
- Cash impact similar to EBIT sensitivity given carried forward tax loss position.
- Net Debt reduction of US\$1.4b in 12 months to 30 June 2017.

Net operating cash flow sensitivity (US\$m)

Estimated impact on FY17 underlying EBIT from changes in commodity prices and currency

		Sensitivity	EBIT Impact (US\$m)
Copper	US\$/lb	US\$0.10/lb / (US\$0.10/lb)	135/(135)
Zinc	US\$/lb	US\$0.10/lb / (US\$0.10/lb)	10/(10) ¹
Lead	US\$/lb	US\$0.10/lb / (US\$0.10/lb)	4/(4)
Gold	US\$/oz	US\$100/oz / (US\$100/oz)	13/(13)
Silver	US\$/oz	US\$1.00/oz / (US\$1.00/oz)	8/(8)
AUD:USD ²	AUD	(10%) / 10%	9/(9)
PEN:USD ³	PEN	(10%) / 10%	4/(4)

1. FY17 Zinc sensitivity does not incl Dugald River. FY17 zinc production guidance is 65-72kt. First production for Dugald River expected 2H17 and production of 170ktpa at steady state
2. AUD:USD FX exposure relates to FX gain/loss on production expenditure at Rosebery and administration expenses at Group Office
3. PEN:USD FX exposure predominantly relates to translation of Las Bambas tax receivables balance and production expenditure
4. Spot Cu, Zn, Pb, Ag, Au, AUDUSD, USDPEN as at 25 October 2017

3. Ongoing efficiency programs

- Track record of C1 improvement at operations
- Mining industry costs likely to have seen bottom of cycle
- Mature operations facing challenges - working hard for incremental improvement
- Efficiency programs in place across all operations and corporate functions
- Expect to deliver annualised overhead savings of ~US\$30m
- Portfolio optimisation initiatives continuing

MMG weighted average Copper C1 costs (US\$/lb)

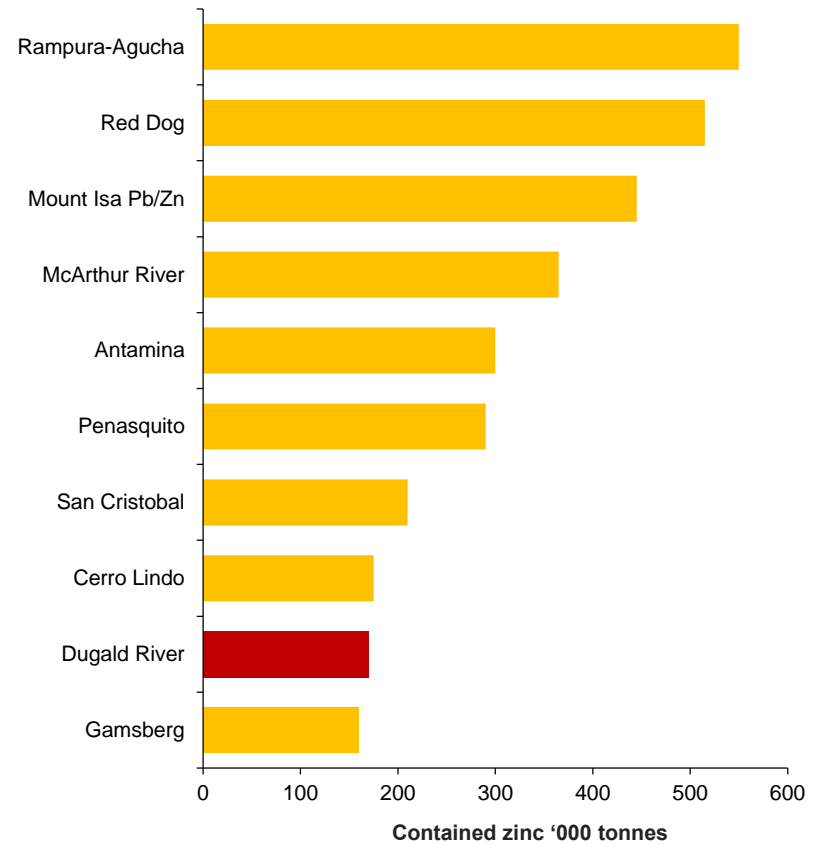

4. Dugald River – to deliver first production 2017

The Dugald River project ahead of schedule

- First production now expected in late 2017 (previously first half 2018)
- Total development capital expected around US\$550-570m (previous range of US\$600-620m)
- Will be one of the 10 largest zinc mines globally
- Highest-grade zinc project in development
- Large scale and long life – annual production of 170 kt Zn; ~25 year life
- Strong cash flow potential – steady state C1 costs of US\$0.68 – 0.78/lb

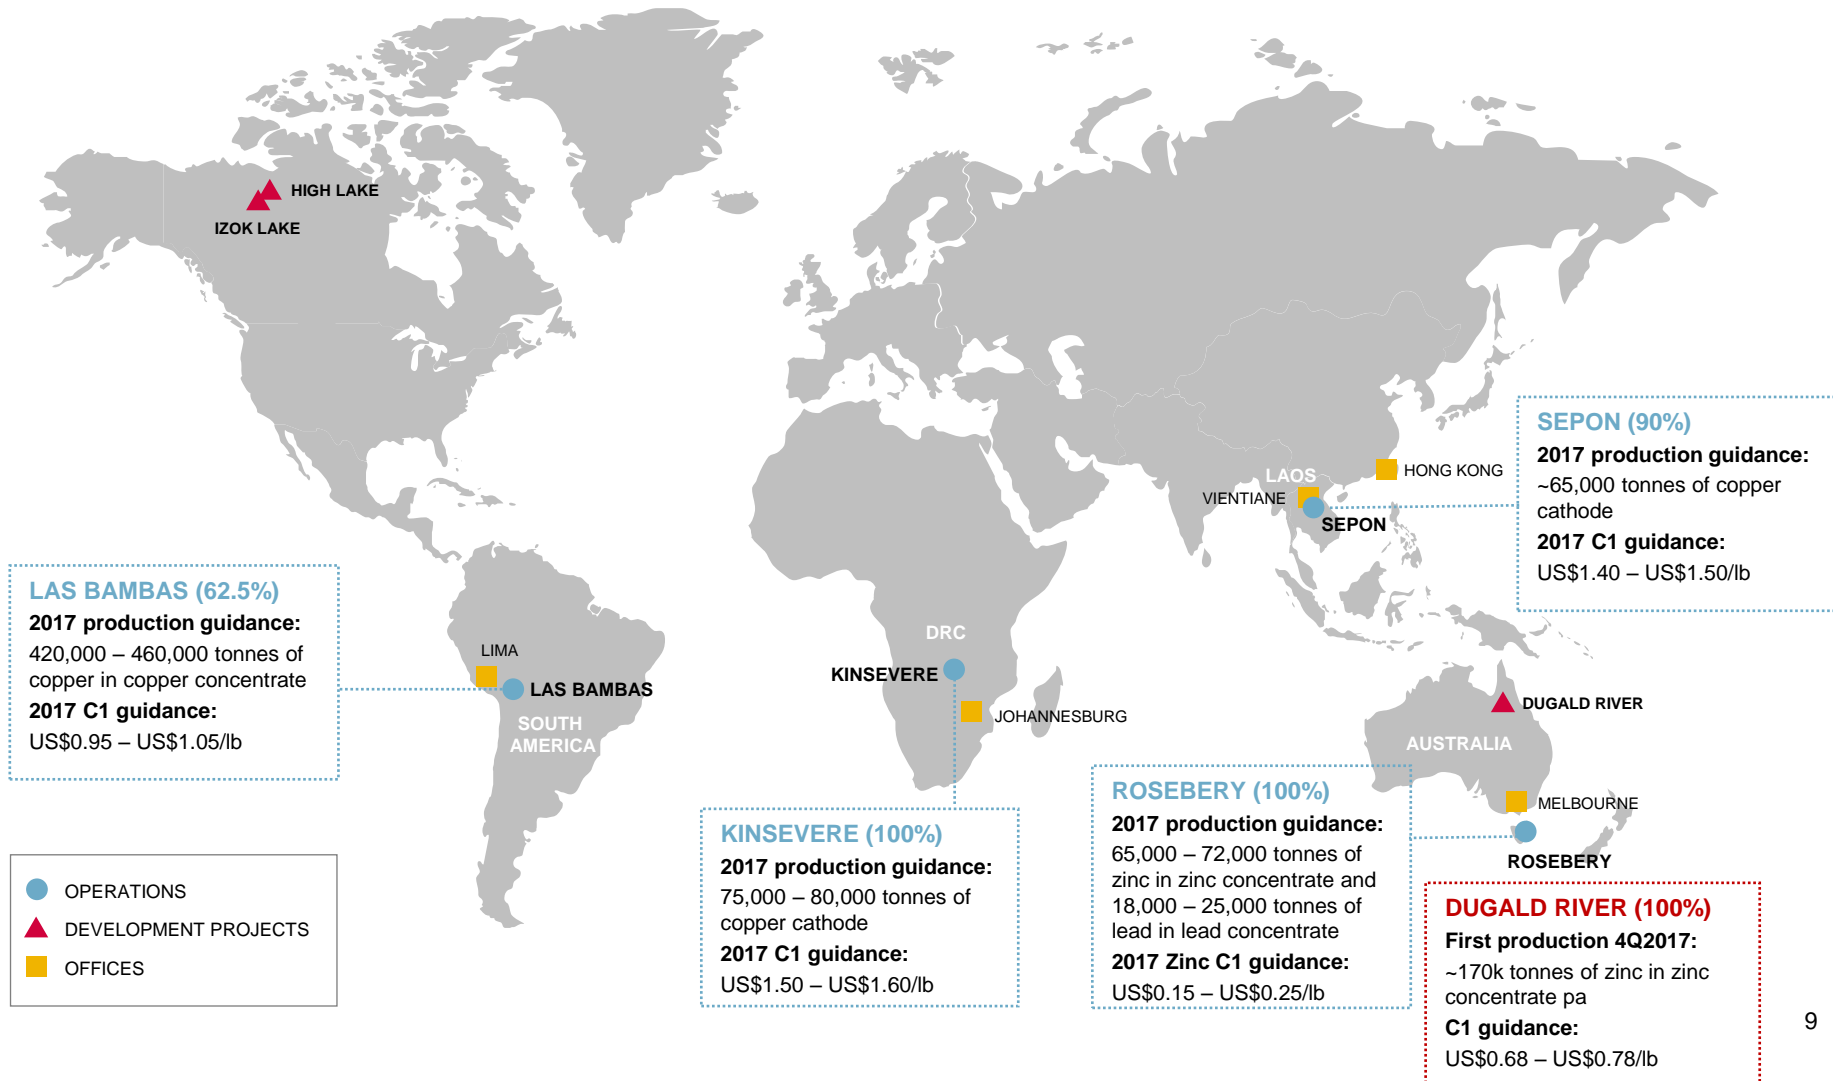

2019 forecast production capability¹

Source: a selection of top 10 zinc producers from the Wood Mackenzie Base Metals Markets Tool (Q3 2017)

1. Only includes mines producing zinc and lead as primary commodities

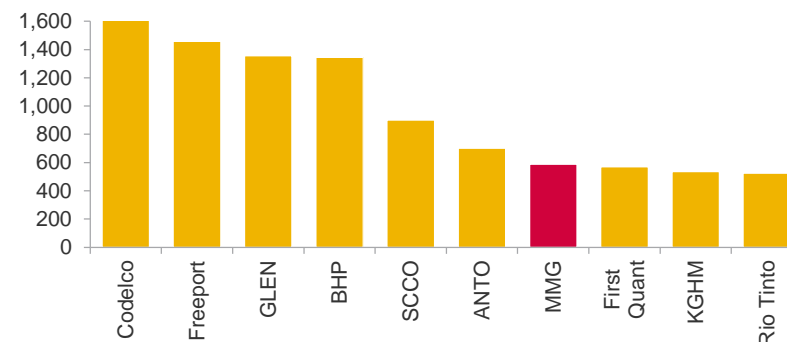

We have a globally diversified portfolio of base metals operations and development projects

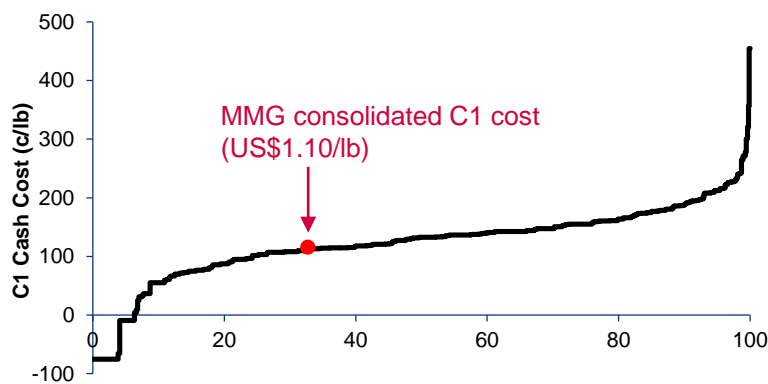

Sustained production growth

- Top 10 miner of copper and zinc
- Low cost position
- Delivered 15% pa growth in Cu equivalent production over 5 past years
- 2016-2018 Las Bambas (Cu) and Dugald River (Zn) growth

World's top copper producers (2017)¹ Kt

C1 copper cost curve (2017)²

 2. Wood Mackenzie Q2 2017 Composite C1 Cash Cost Curve. MMG consolidated C1 based on the guidance ranges for Las Bambas, Kinsevere and Sepon.

Positive outlook for copper and zinc

Attractive fundamentals and insights from major shareholder support commodity outlook

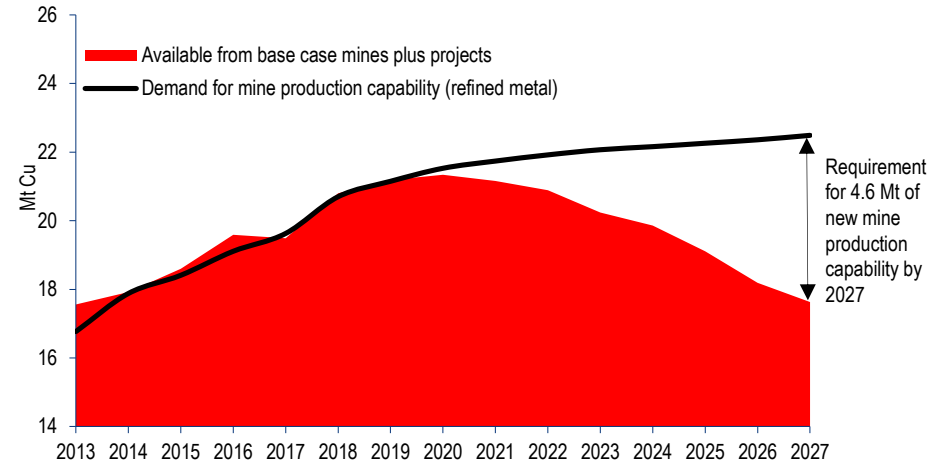

- Supply risks growing – social, political, grade and under-investment
- Demand growth – US/Euro recovery, EV demand, urbanisation
- Understanding China fundamentals a competitive advantage
- One belt. One road.

Copper head grade and production

Mined copper supply gap and requirement for new capacity

Source: Wood Mackenzie Q3 2017

Mined zinc supply gap and requirement for new capacity

Source: Wood Mackenzie, Q3 2017

Growth

- ✓ Major shareholder support has enabled MMG to fund and deliver world top 10 copper and zinc mines at a time of improving supply/demand fundamentals

Operational Excellence

- ✓ Track record of continuous improvement.

Shareholder value

- ✓ 12 month total shareholder return of 110%. Strong cash generation and near term focus on debt reduction

Appendix

Overview

- Founded in 2009, MMG is a diversified base metals company with four operating mines and one development project located across four continents
- Headquartered in Melbourne (Australia), with a primary listing on the HKEx (1208 HK) and a secondary listing on the ASX (MMG ASX)
- Primary exposure to copper and zinc, with smaller exposures to gold, silver, lead and molybdenum
- MMG's flagship asset, the Las Bambas copper mine, reached commercial production on 1 July 2016 and is expected to be world's seventh largest copper mine by 2017

Shareholder base

Las Bambas

Copper – production 420,000 – 460,000 tonnes

Copper – C1 costs US\$0.95 – 1.05 / lb

Kinsevere

Copper – production 75,000 – 80,000 tonnes

Copper – C1 costs US\$1.50 – 1.60 / lb

Rosebery

Zinc – production 65,000 – 72,000 tonnes

Zinc – C1 costs US\$0.15 – 0.25 / lb

Lead – production 18,000 – 25,000 tonnes

Sepon

Copper – production ~65,000 tonnes

Copper – C1 costs US\$1.40 – 1.50 / lb

Key highlights from 3Q 2017 Production Report

- TRIF for the third quarter 2017 was 1.56 per million hours worked.
- Copper production of 147,888 tonnes, 4% above 2Q17, Strong output at Las Bambas and Kinsevere.
- Record production at Las Bambas (114,169 tonnes) and Kinsevere delivered its second strongest production quarter (20,758 tonnes).
- Dugald River now 89% complete and on target for first production by the end of 2017. Total development cost now expected to be between US\$550–570 m (previous guidance US\$600–620 m).
- Sepon produced 12,658 tonnes of copper cathode. Production was negatively impacted by severe weather and the processing of lower grade, more complex ores.
- Rosebery's production of zinc in concentrate was down 6% compared with the 2Q17 due to maintenance activities in the mill, partially offset by stronger zinc grade.
- MMG released its Mineral Resources and Ore Reserves Statement as at 30 June 2017. Mineral Resources (contained metal) have decreased for copper (-10%) and zinc (-10%). Ore Reserves (contained metal) have increased for zinc (28%) and decreased for copper (-6%).
- Cost and efficiency improvement initiatives continue across all sites, group and support functions.
- MMG expects to produce 560,000–615,000 tonnes of copper and 65,000–72,000 tonnes of zinc in 2017.

3Q 2017 production summary

	3Q 17	3Q 17 vs 3Q 16	3Q 17 vs 2Q 17	YTD	YTD 17 vs YTD 16
COPPER CATHODE (tonnes)					
Kinsevere	20,758	4%	5%	59,961	0%

Appendix: 1H17 results summary

Revenue, Earnings, NPAT and Cash Improve in H1

US\$ million	1H16	2H16	1H17	1H7 v 1H16
Revenue	586.1	1,902.7	1,942.4	231%
Underlying EBITDA	134.3	814.9	855.0	537%
Underlying Profit / (Loss) After Tax	-93.0	-5.7	107.8	N/A
Net Operating Cash Flow	57.7	664.6	1,116.0	1834%
Net Debt	10,279.8	9,786.8	8,918.6	13%

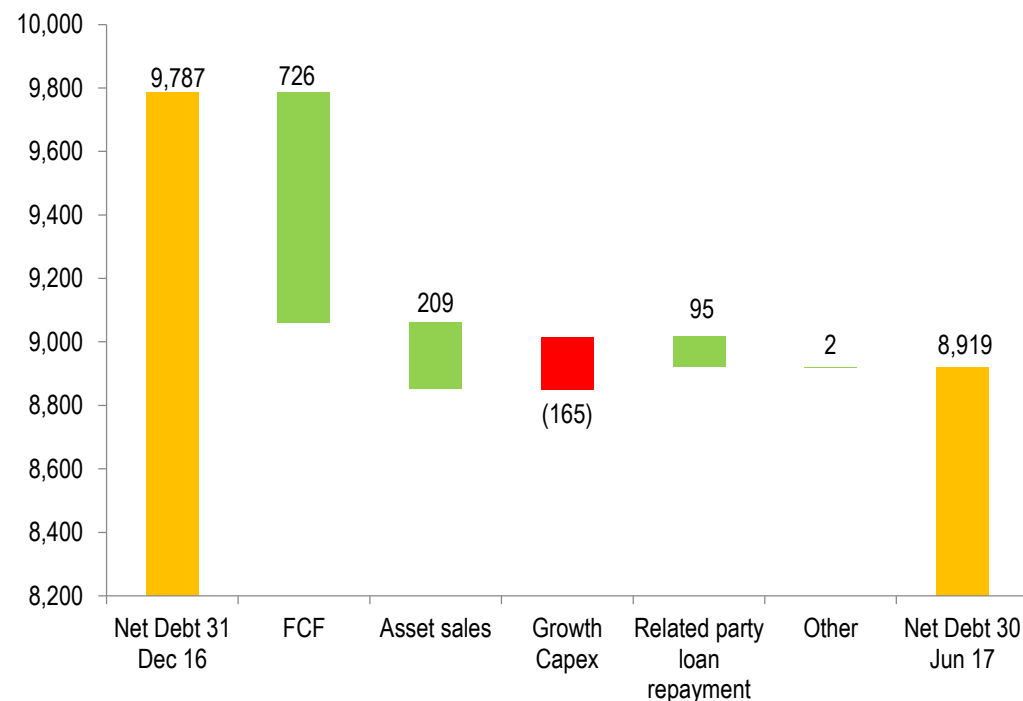

Underlying earnings up over 500%, costs controlled

Net debt down US\$868m

- Net debt reduction of US\$868m, driven by:
 - Free Cash Flow¹ of US\$726m
 - US\$209m from asset sales
 - Growth capital predominantly relates to Dugald River development (~US\$200m remaining)
- Post balance date: Surplus cash used to prepay US\$500m of Las Bambas Project Debt. Annualised interest saving of ~US\$25m²

Movements in Net Debt (US\$m)

1. FCF = Net Operating Cash Flow less sustaining capex and net financing costs paid.
2. Subject to prevailing LIBOR

Well managed debt maturity profile

- Gross debt reduced by >US\$1b in 2017 YTD
- Average outstanding maturity profile now ~8 years

Debt repayment schedule¹ (US\$m)

1. Principal and interest payments including Joint Venture partner liabilities. Excludes related party debt which includes US\$2.262 billion shareholder loan and interest payable thereon. Also excludes US\$350m Las Bambas revolving facility, which was un drawn at 30 June 2017

Las Bambas 1H17 overview – 12 months of stable production

- Las Bambas demonstrated 12 months of stable operation since achieving commercial production on 1 July 2016. Total production over the previous 12 months of 430kt at a C1 cost of US\$1.02/lb.
- Production of 218,440 tonnes of copper in copper concentrate in 1H17, 3% above 2H16.
- Revenue of US\$1,361.7 million was driven by payable metal in product sold of 223,065 tonnes of copper concentrate.
- Inventory on hand remained at low levels with no significant logistics disruptions during the first half of 2017.
- Total operating expenses were \$608.0 million and EBITDA for the six-month period was US\$756.4 million (2016: \$16.9 million).
- MMG expects total copper in copper concentrate production for 2017 at Las Bambas of 420,000 to 460,000 tonnes, with C1 unit costs to be in the range of US\$0.95/lb to US\$1.05/lb. Making Las Bambas one of the lowest cost copper mines of this scale in the world. C1 costs for the six months to 30 June 2017 were US\$1.01/lb.
- In 2017, Las Bambas has embarked on an efficiency review with the full benefit of this program expected to be realised in 2018.

Financials

US\$ million	1H17	1H16 ¹	%
Revenue	1,361.7		N/A
EBITDA ¹	756.4	16.9	4,376%
EBIT	476.8	16.9	2721%
EBITDA margin (%)	56%		N/A
Production	218,440		N/A
C1 costs – copper (US\$ / lb)	1.01		N/A

1. EBITDA includes revenue, operating expenses and other income and expense items. Las Bambas was only accounted for as an operation from 1 July 2016 when commercial production was achieved, and therefore the operating results for the six months ended 30 June 2016 do not take into account sales, operating expenses and depreciation and amortisation expenses

Kinsevere 1H17 overview – strong production continues

- Production down 2% on the prior period to 39,203 tonnes of copper cathode due to lower mill throughput. Revenue increased by US\$34.5 million (18%) as a result of higher copper prices
- Operating costs increased due to higher strip ratios and more material being mined in 2017.
- C1 costs expected to be US\$1.50-1.60/lb. Higher acid costs and short-term optimisation of the mine plan has resulted in the mining of more ore and less waste than originally planned, which has had the effect of increasing C1 cost (through lower capitalisation of waste movement). C1 costs have also been adversely impacted by costs associated with the addition of a new contractor in 1H17.
- Kinsevere delivered a new record production month in July 2017

Copper cathode production

C1 costs – copper (US\$ / lb)	1.62	1.23	

1. EBITDA includes revenue, operating expenses and other income and expense items

Power utilisation

Sepon 1H17 overview – record asset utilisation

- Sepon produced 32,456 tonnes of copper cathode in 1H17(-10%) with continued transition to lower grade, more complex ores.
- The decline in grade was partially offset by record asset utilisation, with plant throughput 30% above the first half of 2016, and higher copper prices.
- A review that focused on all activities and costs was implemented at Sepon in 2016 to rebase the asset for a lower grade future and this program is expected to deliver cost savings of US\$18m in 2017.
- MMG expects Sepon C1 unit costs to be in the range of US\$1.40/lb to US\$1.50/lb with total copper cathode production around 65,000 tonnes.
- MMG continues to actively review future options for the Sepon mine and associated infrastructure following the depletion of the existing high grade copper Ore Reserves expected over the next three to four years. Future production options being assessed include the processing of lower grade copper ores, the restart of oxide gold production and the exploitation of the sizeable primary gold Resources within the MEPA area as well as other external options.

Financials

1. EBITDA includes revenue, operating expenses and other income and expense items

Copper cathode production

kt

Australian Operations 1H17 overview

- Lower revenue due to sale of Golden Grove in February 2017 and lower sales volumes at Rosebery due to declining grades.
- C1 zinc cost guidance reduction at Rosebery to US\$0.15-0.25/lb (was US\$0.25-0.35/lb) due to lower than planned Treatment Charges for zinc concentrate and a continued focus on cost and efficiency.
- MMG expects to produce between 65,000–72,000 tonnes of zinc in zinc concentrate and 18,000–25,000 tonnes of lead in lead concentrate at Rosebery in 2017
- Golden Grove sold to EMR for US\$210m on 28 February 2017
- Transaction for the transfer of Century assets and infrastructure and associated liabilities completed on 28 February 2017
